# Company Profile

Our firm was established in 1970 as Jim's Plating Supply, Inc.

In 1997, as the business grew, we changed the name to JPS Technologies, Inc. to better reflect our business as a leader in the industries we still serve today.

JPS Technologies supplies equipment and chemicals to the Surface Finishing, Electroplating, Printed Circuit Board, Aerospace, Rotogravure and other related wet processing industries.

As a distributor, JPS Technologies represents many major manufacturers throughout the United States and Internationally. JPS Technologies has a highly experienced sales force based out of our Cincinnati location and our sales team travels throughout the world to service our valued customers.

## Specification & Design

JPS Technologies specializes in custom design and fabrication. JPS Technologies combines the experience and the know-how to offer systems designed to meet your specific requirements complimented by supplying standard components and proven procedures.

JPS Technologies manufactures custom manual and automatic electroplating and wet processing systems which service the Electroplating, Anodizing, Aerospace, Printed Circuit Board, Rotogravure, Semi Conductor and Tubing Industries. In addition JPS Technologies retrofits existing automatic process lines with new hoist and controls.

## Custom Engineering

JPS Technologies engineers work cooperatively with the customer to design the process equipment, building layouts, chemical requirements and in meeting OSHA and EPA regulations. Mechanical and electrical CAD drawings are reviewed with the customer to assure 100% customer satisfaction.

## Fabrication & Assembly

JPS Technologies specializes in custom fabrication and assembly including but not limited to: laboratory fume hoods and sinks, cleaning, etch and plating consoles, tubing plating machines, metal fabrication and bio remediation systems.
